

WSP AI WORKFLOW DOCUMENTATION

Engineering Tomorrow | AI-Assisted Brand Film Concept for WSP

TOOLS BY PRODUCTION STAGE

Fifteen tools mapped to the five stages of production — not used interchangeably, but chosen for what each stage requires.

01	IDEATION & CONCEPT	ChatGPT, Claude	Concept development, script structuring, prompt engineering
02	IMAGE GENERATION	Midjourney, Adobe Firefly, Flux, Nano Banana Pro	Concept stills and key visual references for each scene
03	IMAGE ENHANCEMENT	Magnific	Upscaling and detail refinement before animation
04	VIDEO GENERATION	Kling, Sora, Higgsfield, Google Flow, Google Labs	Image-to-video animation, camera movement, motion
05	POST-PRODUCTION	Adobe Premiere Pro, After Effects, Photoshop, Illustrator	Editing, compositing, color grading, sound, final assembly

TIMELINE, COST & SCALABILITY

Total production time: 3 working days, concept to final delivery.

DAY 1

Concept & Pre-Visualization

Script & concept (ChatGPT, Claude) — Storyboard — Image generation & selection (Midjourney, Firefly, Flux, Nano Banana Pro) — Upscaling (Magnific)

DAY 2

Video Generation

Image-to-video animation and iteration across scenes (Kling, Sora, Higgsfield, Google Flow, Google Labs) — Take selection

DAY 3

Post-Production & Documentation

Edit, motion graphics, color grade, sound (Premiere Pro, After Effects, Photoshop) — Final QA — Workflow & Lab documentation

ESTIMATED TOOL COST

ChatGPT Plus	\$20/mo
Claude Pro	\$20/mo
Midjourney (Basic)	\$10/mo
Adobe Firefly	\$10/mo
Kling AI (Standard)	\$10/mo

Higgsfield	~\$20/mo
Magnific	~\$15/mo
Google AI Pro (Flow / Labs)	\$20/mo
Adobe Creative Cloud (Premiere, AE, Photoshop)	\$60/mo

~\$185/mo at full published rates. This reflects one designer holding every listed subscription simultaneously; most were already active tools, and public pricing may vary by region/tier. Actual incremental cost for one assignment is lower.

SCALING THIS WITHIN WSP

A shared subscription pool (not per-designer) cuts the effective cost per project well below this figure. Reusable prompt templates and a shot-type library shorten Day 1 significantly on repeat briefs, and the same 3-day pipeline scales to bids, leadership content, and internal campaigns without new tooling.

THANK YOU
